PROFILE

Motivated **Computing and Data Science student at Sai University** pursuing a minor in **Cyber Security**, with an interest in data analytics, artificial intelligence, web technologies, and cybersecurity. Experienced in developing **Power BI dashboards, web technology projects, and Agentic AI applications** through academic and practical work. Passionate about learning emerging technologies and applying computational and analytical skills to solve real-world problems.

EDUCATION

Sai University

Computing and Data Science

Minor: Cyber Security

Currently pursuing undergraduate studies with a focus on computing, data science, artificial intelligence, and cybersecurity.

TECHNICAL SKILLS

Programming & Development

- Python
- HTML
- CSS
- JavaScript
- Web Development

Data & Analytics

- Power BI
- Data Visualization
- Dashboard Development
- Data Analysis

Artificial Intelligence

- Artificial Intelligence
- Agentic AI
- AI-based Applications
- Problem Solving

Cyber Security

- Cybersecurity Fundamentals
- Network Security Fundamentals
- Digital Security

Tools

- Git
- GitHub
- Visual Studio Code
- Power BI

PROJECTS

Power BI Dashboard

Power BI | Data Visualization | Data Analytics

- Designed an interactive Power BI dashboard to transform data into meaningful visual insights.
- Created visualizations and dashboard components to present information clearly.
- Used data-driven analysis to identify patterns and communicate insights effectively.

Web Technology Projects

HTML | CSS | JavaScript | Web Development

- Developed web-based projects using modern front-end technologies.
- Designed responsive and user-friendly web interfaces.
- Applied HTML, CSS, and JavaScript concepts to create functional web applications.

Agentic AI Project

Artificial Intelligence | Agentic AI

- Explored the concepts of Agentic AI and intelligent systems.
 - Worked on an AI-based project involving autonomous task-oriented workflows.
 - Developed an understanding of how AI agents can reason, interact with tools, and accomplish multi-step tasks.
-

AREAS OF INTEREST

- Data Science
 - Data Analytics
 - Artificial Intelligence
 - Agentic AI
 - Web Technologies
 - Cyber Security
 - Machine Learning
 - Technology & Innovation
-

CORE STRENGTHS

- Analytical Thinking
- Problem Solving
- Creativity
- Team Collaboration
- Communication
- Adaptability
- Quick Learning

- Interest in Emerging Technologies
-
